## PORTFOLIO.

## DATA BANK

---

The management team at Data Bank want to increase their total customer base - but also need some help tracking just how much data storage their customers will need. This case study is all about calculating metrics, growth and helping the business analyse their data in a smart way to better forecast and plan for their future developments!

## Churn Prediction

---

Dataset contains information about a telecommunications company in California during the third quarter. It shows which customers have churned, stayed, or signed up for services. This project aims to develop a machine learning model that can predict which customers of a telecommunications company are likely to churn.
